Blind Veterans

Continuing the Quest for Freedom

The National Federation of the Blind (NFB) is fully committed to providing blinded and visually impaired veterans the network of support and help they need to live fulfilling and independent lives. Both our local and statewide resources can help newly blinded or visually impaired veterans connect with others like themselves to discuss experiences and offer guidance.

The National Federation of the Blind, NFB, means *Never Felt Better*.
– Joe, Blind Veteran

Established in 1940, the National Federation of the Blind is the world's largest and most influential organization of blind people. We work together to improve the quality of life for all blind and visually impaired people through support, training, and advocacy. We know through our own experiences that blindness doesn't have to be a barrier to accomplishing any goal that a person may have! We have over 50,000 members with

affiliates in every state including Puerto Rico and the District of Columbia. Additionally, we have 700 local chapters in communities across the United States that are available to provide support and assistance to blinded and visually impaired veterans and their families.

The NFB gave me life. I thought I was done for and now I am just beginning enjoying a brand new life!
– Don, Blind Veteran

The National Federation of the Blind is founded on a positive attitude about blindness. We believe that when given training and opportunity, blind people can work, raise families, enjoy recreational activities, and contribute to society. Essentially, you can live full and productive lives like any other American. We want to help all blinded and visually impaired veterans take charge of their lives and find true independence.

We invite you to learn about the services we have available through our national network.
