I believe that I could not have reached my potential in mathematics without the Nemeth Code. With it, I am able to read and write mathematics, as well as other sciences, at all levels, limited only by my talent and my ambition.

—Dr. Abraham Nemeth, creator of the braille code for mathematics and science notation

### DEDICATION

I credit my interest in the continued training of braille transcribers in the Nemeth Code to my friend and mentor, Helen Hay, whose fascination and enthusiasm about this braille code was contagious.

### THANKS

I offer my gratitude to the original authors of this lesson manual, Helen Roberts, Bernard M. Krebs, and Barbara Taffet, for their insight into the learning process and for their eye for detail. Many of the excellent examples from the original book are preserved in this edition. I also wish to thank my supervisors and colleagues in the Madison Metropolitan School District for realizing the importance of the development of this curriculum.

—Lindy Walton

## ABOUT THE PROGRAM

This course is designed for the UEB certified transcriber who is ready to take on the challenge of transcribing print mathematics and science materials into braille using the Nemeth Braille Code for Mathematics and Science Notation. The program operates under a contract with the National Library Service for the Blind and Print Disabled, Library of Congress (NLS). All transcribing and proofreading course lessons and tests are administered under the National Federation of the Blind Braille Certification Training Program (BCTP). The following information is copied from the (2022) cover letter that the enrolled student will receive when accepted into the course. Up-to-date instructions will be sent at the time of enrollment.

The course is based on The Nemeth Braille Code for Mathematics and Science Notation, 2022, a publication of the Braille Authority of North America (BANA). Course materials do not supersede the authority of the official BANA code book.

### *Eligibility*

- United States citizenship or residency
- High school diploma or equivalent
- Knowledgeable in recommended braille formats for textbooks

### *Prerequisite*

- Library of Congress certification in literary braille transcribing (UEB) for a minimum of six months

### *Equipment*

Any of the following methods may be used in order to submit lesson exercises in braille: a forty-cell slate, a braillewriter, or a computer application that allows for direct input of 6-key braille. Use of back translation is allowed but 6-key entry is a necessity as well. A line length of forty cells is required, regardless of production method.

### *The Lesson Material*

The lessons are available by following the “Mathematics Braille Transcribing” link at [www.nfb.org/transcribers](http://www.nfb.org/transcribers). If you are unable to utilize the material from the website, please contact us at [transcribers@nfb.org](mailto:transcribers@nfb.org) or (410) 659-9314, extension 2510, and we will work with you to ensure you receive the material in a format that is usable for you.

Most lessons conclude with an exercise, which will be given to you as you complete each lesson and which is to be submitted to your grader for evaluation. You are encouraged to submit your work on a regular basis (at least monthly). You may submit only one lesson at a time.

Revisions to the online course lessons are occasionally necessary. The student should check the website to ensure that any lesson being completed is the current version. To report errors in this instruction manual, please send your message to [transcribers@nfb.org](mailto:transcribers@nfb.org).

### *Your Grader*

A student must take the course by correspondence with the NFB. After receiving your transcription of the first exercise, a grader will be assigned. Your grader will evaluate your first submission and will be your point of contact for the rest of the course.

### *The Certification Test*

Upon completion of the course, the student may apply for the certification test. When requesting the test, students who have taken the course locally must include a letter from their Library of Congress certified mathematics braille instructor attesting that the student has successfully completed the course. Certification tests are distributed and evaluated by the National Federation of the Blind. Instructions for preparation and submission will accompany the exam. The Library of Congress remains the certifying authority. Candidates scoring a passing grade will receive a Library of Congress certificate.

### *How to Enroll*

Whether intending to take the course with a local teacher or through correspondence, prospective students must submit the application form before beginning the course. Applicants can enroll in the course in one of two ways.

- Complete the application online at <https://nfb.org/programs-services/braille-certification/mathematics-braille-transcribing>
- Or mail a print application to the address shown below.

## FOREWORD TO THE 2022 EDITION

The first edition of the *Introduction to Braille Mathematics* was published in 1978 and was written by the late Helen Roberts and Bernard M. Krebs. It was my privilege to complete the text with Mr. Krebs after Helen passed away. Since that time, numerous corrections and updates have been made both to the Nemeth Code itself and to this manual. Now, however, a major change has necessitated a complete rewriting of the lessons. 2016 was the implementation year in the United States for new transcriptions to be produced using the Unified English Braille Code. Because Nemeth Code works *within* UEB, many of the rules of Nemeth Code must be modified.

After the first lesson most examples, practices, and exercises are shown in a text-like context. In this way, the student can see how the Nemeth Code works in a real setting such as found in texts of many grade levels and complexities.

The practices within each lesson are available for self checking by the student. Answers to the practices are given at the end of each lesson. Braille reading practice is offered in Appendix A. Most lessons conclude with an exercise which will be sent to you and evaluated by your teacher or by your NFB-assigned grader.

The student should understand that the Nemeth Code itself is the authoritative source for all mathematics transcriptions. The student should also be thoroughly familiar with the sourcebooks listed in the PREREQUISITES which follow this Foreword.

It has long been my hope that this manual could be brought into the present era. Lindy Walton, an experienced transcriber who works with the NLS Nemeth certification program, led the writing of this Second Edition. Once again, it is my honor to work with an exceptional member of the braille transcriber community.

Both Lindy and I thank the following for their support and help: Mary Denault, Peggy Jackson, Bill Jackson, Kyle DeJute, Julie Sumwalt, Lynnette Taylor, the members of the BANA Nemeth Code Technical Committee, the Grafton Braille Service Center, and the students who participated in the beta testing of this course. Lastly, we direct our sincerest gratitude to the National Federation of the Blind which has lent support to the development and publication of this comprehensive manual.

—Barbara Taffet

## PREREQUISITES

A prerequisite to the study of the Nemeth Code within UEB context is certification in Unified English Braille, adequate experience in literary braille transcription, and confidence in your production method. Before beginning this course of study the student should also be thoroughly familiar with current methods for transcribing a textbook. Rules and guidelines are found in the following sourcebooks, all of which are available from the Braille Authority of North America (BANA) at [www.brailleauthority.org](http://www.brailleauthority.org). Dates shown below are the editions used as a resource in this lesson manual.

*The Rules of Unified English Braille, Second Edition 2013*

*Braille Formats: Principles of Print-to-Braille Transcription, 2016*

*The Nemeth Braille Code for Mathematics and Science Notation, 2022*

*Guidelines and Standards for Tactile Graphics, 2022*

*Chemical Notation Using Nemeth Braille Code, 2022*

## STUDY TIPS

### HOW TO BECOME AN EXCELLENT NEMETH BRAILLE TRANSCRIBER

Do not race through the lesson material.

- Read carefully and deliberately as the narrative is compact and the language is exact.
- Study the examples and understand the point being made with each one but do not rely on the examples alone for an understanding of the rules. Transcribe the examples to reinforce the rule.
- Do the practice drills. Proofread them before checking the answers. See more tips below.
- Try back translating the braille examples and practices without looking at the print.
- Take special note of rules regarding spacing, punctuation, abbreviations, and format.
- Make lists to help you remember differences between Nemeth and UEB rules.
- Do not be afraid to underline, highlight, or write notes in the margins of your lesson manual.

If the braille or the print doesn't make sense to you ...

- Compare new information to similar topics learned in previous lessons.
- Some of the lesson material is grouped in "use of" and "nonuse of." Compare them and look closely at the braille examples.

### THE PRACTICE MATERIAL

- Slow down. By using 6-key entry instead of a translator you will better understand the braille from the reader's point of view.
- Compare your braille transcription to the answers to the practice material found at the end of each lesson. Read each cell closely.
- At the end of each line, look at the braille cell in the line above and in the line below and compare it to the answer key. Any misalignment indicates an error on that line.
- When you identify your errors, return to the lesson to review the applicable rule.

### PREPARING THE EXERCISE FOR GRADING

- Do not try to copy braille examples that look like the exercise material. Instead, understand and apply the rule.
- Do not guess. Do not rely on the proofreader's report to find your mistakes.
- Proofread carefully before turning in for grading. Your knowledge and understanding of the Nemeth Code will improve dramatically if you proofread from an embossed copy or from a simulated braille (print) copy, without looking at the print.
- Make note of items you are unsure of. If your transcription is correct, look these items over again after receiving your report to reinforce the rule.

### RESEARCH/REVIEW

- Analyze the mistakes found in your work and make sure you understand your errors before moving ahead to the next lesson. Ask questions until you are sure of the rule.
- Return to earlier lessons. Topics will make more sense to you in retrospect.
- Read the index. Terminology used there will help you understand the language of Nemeth braille.

- Review format rules learned in earlier lessons. Study the examples.
- Return to an earlier lesson exercise and back-translate the practices or your braille exercise by writing in longhand. Do not look at the print copy until you are finished. Giving yourself some distance from the lesson material is a good review strategy.
- In later lessons, research the topic in the Nemeth Code in addition to studying the lesson book. Not only will this enrich your understanding of the current subject, you will also review material already learned in a new context.

### **PROOFREADING TIPS**

Accuracy is crucially important in technical work. Your proofreading skills will be challenged.

- Is your lighting adequate?
- Use a magnifier when print is questionable.
- Use a straightedge when levels are in question.
- Take breaks when your concentration wanes. Then go back a few pages when resuming proofreading.
- Read the braille dots. Compare often to the print copy.
- Vary your reading medium – don't always proofread from the screen or from simulated braille or from embossed braille.

### **BRAILLE TRANSLATION SOFTWARE**

Many students of the Nemeth Code have been transcribing for years and have thousands of pages of braille to their credit. They also have been taking advantage of the many electronic input and proofreading aids available to transcribers and are quite adept at turning out high quality work. We expect you are one of those transcribers.

You are undertaking a serious study of one of the technical braille codes, and we would like you to consider stepping back a bit and learning the old fashioned way, using 6-key entry in your braille software program. It is our experience that the best transcribers are those that can read and write braille as the 6-dot code that it is, not solely reading a back translation or a source file and not using another input code to 'type' math problems. Using proofreading and production aids for more accurate and faster work is certainly something you will continue to use – it is important that you understand how your particular software and translation tools work in Nemeth mode – but we are convinced you will understand the Code better if you take the 6-key approach while learning.

### INTRODUCTION TO FRACTIONS

#### *Simple Fractions*

8.1	Definition . . . . .	8–2
8.2	Simple Fraction Indicators . . . . .	8–3
8.3	The Horizontal Simple Fraction Line . . . . .	8–3
	<i>Practice 8A</i> . . . . .	8–5
8.4	The Diagonal Simple Fraction Line . . . . .	8–6
8.4.1	Use of Simple Fraction Indicators with the Diagonal Simple Fraction Line . . . . .	8–6
8.4.2	Type Size on the Baseline of Writing . . . . .	8–6
8.4.3	A Reminder About the UEB Slash . . . . .	8–8
8.4.4	Spacing . . . . .	8–8
8.4.5	Code Switch Reminders . . . . .	8–9
	<i>Practice 8B</i> . . . . .	8–11

#### *Mixed Numbers*

8.5	Definition of Mixed Number . . . . .	8–12
8.5.1	Use of Mixed Number Fraction Indicators . . . . .	8–12
8.5.2	Mixed Numbers and Omissions . . . . .	8–13
8.5.3	Nonuse of Mixed Number Fraction Indicators . . . . .	8–13
	<i>Practice 8C</i> . . . . .	8–13

#### *Complex Fractions*

8.6	Definition of Complex Fraction . . . . .	8–14
8.6.1	Use of Complex Fraction Indicators and Complex Fraction Lines . . . . .	8–14
	<i>Practice 8D</i> . . . . .	8–15

#### *More Fraction Rules*

8.7	Fractions and the Baseline Indicator . . . . .	8–16
8.8	Further Observations Regarding Spacing . . . . .	8–16
8.9	Fractions and the Ellipsis and Long Dash . . . . .	8–17
8.10	Fractions in an Enclosed List . . . . .	8–18
	<i>Practice 8E</i> . . . . .	8–19

### RADICAL EXPRESSIONS

8.11	Terminology . . . . .	8–20
8.12	The Termination Indicator . . . . .	8–20
8.13	Spacing . . . . .	8–21
8.14	Index of Radical . . . . .	8–21
	<i>Practice 8F</i> . . . . .	8–22
8.15	Nested Radical Expressions . . . . .	8–23
8.15.1	Nested Radical Expression with an Index . . . . .	8–23
8.16	Radical Expressions and the Baseline Indicator . . . . .	8–23
8.17	Radical Expressions and the Ellipsis and Long Dash . . . . .	8–24
8.18	Radical Expressions and Abbreviations . . . . .	8–24
8.19	Enclosed Lists with Radical Expressions . . . . .	8–24
	<i>Practice 8G</i> . . . . .	8–25

### LINKED EXPRESSIONS

8.20	Definition of Linked Expression . . . . .	8–25
8.21	Division of Linked Expressions . . . . .	8–26

8.21.1	Restrictions	8–27
8.21.2	Other Considerations	8–27
	<i>Practice 8H</i>	8–28
8.22	Special Case—Nested Linked Expressions	8–29
8.22.1	Margin Requirements for a Nested Linked Expression	8–30
8.22.2	Nested Linked Expression Displayed to Narrative	8–30
	<i>Practice 8I</i>	8–33
8.22.3	Nested Linked Expression Displayed to Itemized Material	8–33
8.22.4	Itemized Nested Linked Expression with No Narrative	8–37

### ARROWS

9.1	Arrows Used in Mathematics	9–2
9.2	Construction of Braille Arrows	9–2
9.3	Spacing and Punctuation with Arrows	9–2
9.4	Horizontal Arrow Shafts	9–2
9.5	Barbed and Solid Arrowheads	9–3
9.6	Special Case: The Contracted Form of the Right-Pointing Arrow	9–5
9.6.1	Nonuse of the Contracted Form of the Right-Pointing Arrow	9–6
	<i>Practice 9A</i>	9–6
9.7	Blunted, Straight, and Curved Arrowheads	9–7
9.8	Arrows With Dotted Ends	9–8
	<i>Practice 9B</i>	9–9

### *Vertical, Slanted, and Curved Arrow Shafts*

9.9	Arrow Direction Indicators	9–10
9.9.1	Vertical Arrow Shaft	9–10
9.9.2	Slanted Arrow Shaft	9–10
9.9.3	Curved Arrow Shaft	9–12
	<i>Practice 9C</i>	9–12

### *Boldface and Compounded Arrows*

9.10	Boldface Arrow	9–13
9.11	Arrows Used as Signs of Comparison Compounded Vertically	9–13
9.12	Arrows Used as Signs of Comparison Compounded Horizontally	9–14
9.13	Nonmathematical Arrows	9–15

### INTRODUCTION TO SPATIAL ARRANGEMENTS

9.15	Separation Line	9–17
9.16	Alignment with Addition and Subtraction	9–17
9.16.1	Intentional Misalignment	9–18
9.16.2	Operation Sign is Absent	9–18
9.17	Placement of Symbols	9–18
9.17.1	Operation Symbols	9–18

9.17.2 Monetary Symbols . . . . .	9–19
9.18 Side-by-Side Layout . . . . .	9–21
9.18.1 Top Alignment . . . . .	9–21
<i>Practice 9D</i> . . . . .	9–22
9.19 Omissions in Work Arranged Spatially for Computation . . . . .	9–23
9.20 Spatially Arranged Polynomials . . . . .	9–24
9.20.1 Alignment . . . . .	9–24
9.20.2 Placement of the Baseline Indicator . . . . .	9–25
9.20.3 Misalignment in Print . . . . .	9–25
9.21 Abbreviations . . . . .	9–26
9.22 Fractions . . . . .	9–26
9.22.1 Alignment with Mixed Numbers . . . . .	9–27
9.22.1 Alignment of Different Fraction Indicators . . . . .	9–27
9.22.3 Alignment with the Answer . . . . .	9–27
9.22.4 A Linear Portion of a Spatial Arrangement . . . . .	9–28
9.23 Placement of Identifiers . . . . .	9–29
9.23.1 Side-by-Side Layout . . . . .	9–30
<i>Practice 9E</i> . . . . .	9–31
9.24 Regrouping Numbers in Addition Problems . . . . .	9–32
9.24.1 With Identifiers . . . . .	9–33
<i>Introduction to Cancellation</i>	
9.25 Cancellation in Subtraction Problems . . . . .	9–34
9.25.1 With Identifiers . . . . .	9–35

10.14	Omissions in Spatial Division Problems . . . . . 10–25
10.15	Regrouping in Division . . . . . 10–25
10.16	Cancellation in Long Division . . . . . 10–27
10.17	Placement of Identifiers with Spatial Division . . . . . 10–29
10.18	Other Layouts . . . . . 10–29
	<i>Practice 10E</i> . . . . . 10–29
<i>REVISITING SOME RULES</i>	
10.19	Summary of the Use and Nonuse of the Numeric Indicator . . . . . 10–30
10.19.1	Use of the Numeric Indicator . . . . . 10–30
10.19.2	Nonuse of the Numeric Indicator . . . . . 10–31
10.20	Review of Rules for Signs of Grouping . . . . . 10–32
	Answers to Practice Material . . . . . 10–33

## Lesson 11

### *SIGNS OF SHAPE*

11.1	Definition . . . . . 11–2
------	---------------------------

#### *Basic Shapes*

11.2	Basic Signs of Shape Represented by Numbers—Regular Polygons . . . . . 11–2
11.2.1	Unlisted Regular Polygons . . . . . 11–2
11.3	Basic Signs of Shape Represented by Letters—Irregular Polygons . . . . . 11–3
11.3.1	Unlisted Irregular Polygons . . . . . 11–3
11.4	Other Basic Signs of Shape Represented by Letters . . . . . 11–4
11.4.1	Other Unlisted Basic Shapes . . . . . 11–5
11.5	Basic Signs of Shape Represented by Other Dot Combinations . . . . . 11–6

11.6	Filled-In and Shaded Shapes . . . . .	11-6

### MISCELLANEOUS SYMBOLS

#### *Unspaced Symbols*

13.1 Spacing Rules for Unspaced Symbols . . . . .	13–2
13.1.1 Caret . . . . .	13–2
13.1.2 Crossed Letters . . . . .	13–3
13.1.3 Del . . . . .	13–3
13.1.4 Differentials and the Partial Derivative Symbol (Round d) . . . . .	13–3
13.1.5 Empty Set (null set, void set) . . . . .	13–4
13.1.6 Factorial Sign . . . . .	13–5
13.1.7 Infinity . . . . .	13–6
13.1.8 Integrals . . . . .	13–7
13.1.9 Quantifiers . . . . .	13–8
13.1.10 Transcriber-Devised Symbols . . . . .	13–9
<i>Practice 13A</i> . . . . .	13–10

#### *Spaced Symbols*

13.2 Spacing Rules for Spaced Symbols . . . . .	13–11
13.2.1 "At" Sign in Mathematical Context . . . . .	13–11
13.2.2 Check Mark . . . . .	13–11
13.2.3 Ditto Mark . . . . .	13–11
13.2.4 Since (because) . . . . .	13–12
13.2.5 Therefore . . . . .	13–13
<i>Practice 13B</i> . . . . .	13–13

<i>Spacing with the Angstrom Unit and Tally Marks</i>	
13.3	Angstrom Unit . . . . . 13–14
13.4	Tally Mark . . . . . 13–15
	<i>Practice 13C</i> . . . . . 13–16
<i>SUPERPOSED SIGNS</i>	
13.5	Definition and Analysis . . . . . 13–17
13.6	Transcription of Superposed Signs . . . . . 13–18
13.6.1	Integral Modified by Superposition . . . . . 13–18
13.6.2	Signs of Operation Modified by Superposition . . . . . 13–18
13.6.3	Horizontal and Vertical Bars Modified by Superposition . . . . . 13–19
13.6.4	Signs of Shape Modified by Superposition . . . . . 13–19
13.6.5	Two Signs of Comparison Modified by Superposition . . . . . 13–20
13.6.6	Negated Symbols and Tally Marks . . . . . 13–20
	<i>Practice 13D</i> . . . . . 13–21
<i>AMBIGUOUS SIGNS</i>	
13.7	Context . . . . . 13–22
13.7.1	Vertical Bar and Colon . . . . . 13–23
13.7.2	Spacing . . . . . 13–23
13.7.3	Capital Greek Letters . . . . . 13–23
13.7.4	Chemical Notation . . . . . 13–23
<i>MULTIPURPOSE INDICATOR</i>	
13.8	Review . . . . . 13–24
13.9	Additional Uses of the Multipurpose Indicator . . . . . 13–24
13.9.1	Letter Followed by a Decimal Point and a Numeral . . . . . 13–24
13.9.2	Numeric Subscript Followed by a Numeral . . . . . 13–24
13.9.3	Decimal Point Followed by a Nonnumeric Character . . . . . 13–25
13.9.4	Side-by-Side Vertical Bars . . . . . 13–25
<i>REFERENCE SIGNS AND SYMBOLS</i>	
13.10	Reference Signs and Symbols . . . . . 13–26
13.10.1	Asterisk, Daggers, Star, and Other Symbols . . . . . 13–26
13.10.2	Numerals or Letters . . . . . 13–26
13.10.3	Layout and Spacing . . . . . 13–26
13.10.4	The Note . . . . . 13–27

18.8.1	Letters Used as Diagram Labels	18-23
18.9	Switch Indicators and Tactile Graphics	18-24
18.10	Number Lines	18-26
18.11	Diagrams in Exercise Material	18-26
18.12	Molecular Diagrams	18-26
	<i>Practice 18E</i>	18-27
<b>KEYING TECHNIQUE</b>		
18.13	Keying	18-28
18.13.1	Alphabetic Key	18-28
18.13.2	Numeric Key	18-28
18.13.3	Combination Key	18-28
18.13.4	The Key List	18-28
	<i>Practice 18F</i>	18-33
	Answers to Practice Material	18-35

## Final Lesson

F1	Preparing for the Certification Exam	F-1
F2	The Nemeth Code Book	F-1
F3	Beyond the Nemeth Code	F-3

### *Structuring a Textbook*

F4	Transcriber-Generated Pages and Front Matter	F-4
F4.1	Title Page	F-4
F4.2	Special Symbols Page	F-4
F4.3	Transcriber's Notes Page	F-5
	<i>Practice A</i>	F-5
F5	Body of Text	F-7
F5.1	Follow Nemeth Formatting Rules	F-7
F5.2	Follow Braille Formats Guidelines	F-7
F5.3	Context-Dependent Formats	F-8

<i>Four Practices</i>	
<i>Practice B</i> . . . . .	F-10
<i>Practice C</i> . . . . .	F-11
<i>Practice D</i> . . . . .	F-12
<i>Practice E</i> . . . . .	F-14
Answers to Practice Material . . . . .	F-15

## Appendices

### Appendix A—Reading Practice

### Appendix B—Glossary Of Terms

The Four Basic Operations . . . . .	B-1
Many Ways to Denote Multiplication . . . . .	B-2
Fractions . . . . .	B-3
Geometry . . . . .	B-3
Radical Expressions . . . . .	B-4
Statements and Functions . . . . .	B-4
Algebra . . . . .	B-4
Other Terminology Used with Algebraic Expressions . . . . .	B-4

### Appendix C—Nemeth Code Format Summaries

General Principles . . . . .	C-2
“Keep Together” . . . . .	C-2
Margins . . . . .	C-3
Itemized Material . . . . .	C-3
Displayed Mathematical Material . . . . .	C-6
Mathematical Statements and Proofs . . . . .	C-8
Division of Mathematical Expressions Between Braille Lines . . . . .	C-8
Placement of Code Switch Indicators . . . . .	C-9
Spatial Arrangements . . . . .	C-13
